

# Searching for a job in Heilbronn-Franken

## Job seekers visa

Third country nationals can apply for a job seekers visa for six months

- Requirements
  - University degree
  - Sufficient financial means to sustain yourself for the time of the visa and health insurance

If the job hunt was successful, there is no need to leave the country again. The work permit (Aufenthaltstitel zum Zwecke der Erwerbstätigkeit) or the Blue Card EU can be applied for directly in Germany.

### Important !

With the job seekers visa you are not allowed to work. Before starting the new job you have to ask for a work permit at the local foreigners office (Ausländerbehörde) which is why you should plan ahead.

## University graduates

Citizens from third countries, who graduated successfully from a German university, can search for a job in Germany immediately after their studies. The job has to be according to their qualifications. For searching the job, you have a maximum of 18 months during which you have full access to the labour market.

### Important !

The date of a university graduate degree depends on the particular examination regulations. Usually this is the written announcement of the successful passing of your final exam; the date of your removal from the register of students (Exmatrikulation) does not matter. From that point in time, you have a maximum of 18 months during which you have full access to the labor market.

## Graduates of non-academic trainings

Foreigners who made a vocational training in Germany can stay in Germany for a year to search for a job according to their qualifications. In this period of time they are allowed to work to earn a living.
